Robert Marzano and John Hattie have both reviewed research into what teaching strategies make the biggest difference to students'™ results. While they used different methods and terminology, they agreed on these 8 powerful strategies.

8 Strategies Robert Marzano & John Hattie Agree On

2. Learning Theories & Teaching Strategies " Designing Effective Instruction Based on what we know about learning, how can we design instruction that will help students learn more effectively and enjoyably?

Active-Learning Theories (constructivism,...) and Teaching ...

John Hattie developed a way of synthesizing various influences in different meta-analyses according to their effect size (Cohen's d). In his ground-breaking study "Visible Learning" he ranked 138 influences that are related to learning outcomes from very positive effects to very negative effects.

Hattie effect size list - VISIBLE LEARNING

In this blog post I will delve into the brain and explain its basic information processing machinery and compare it to deep learning. I do this by moving step-by-step along with the brains electrochemical and biological information processing pipeline and relating it directly to the architecture of convolutional nets.

The Brain vs. Deep Learning vs. Singularity - timdettmers.com

Software testing is an investigation conducted to provide stakeholders with information about the quality of the software product or service under test. Software testing can also provide an objective, independent view of the software to allow the business to appreciate and understand the risks of software implementation.
